GUJARAT TECHNOLOGICAL UNIVERSITY, AHMEDABAD, GUJARAT

COURSE CURRICULUM COURSE TITLE: OBJECT ORINTED PROGRAMMING (Code:3341602)

| Diploma Programme in which this course is offered | Semester in which offered |
|---|---------------------------|
| Information Technology | 4 th Semester |

1. RATIONALE

Large programs are very compex to write and to understand and prone to errors which can prove to be expansive in software development and maintenance process. Object-oriented programming offers a powerful way to cope with this complexity. Its goal is to develop clearer, more reliable, more easily maintained programs.

This course is designed to help students developing the basic understanding of object oriented paradigm and its advantages. By the end of this course, students will be able to understand the Object Orinted Programming and able to write C++ programs using the Object oriented design, and use the standard C++ library. The programming skills thus acquired using C++ language can be used in developing programs for the scientific, and business purposes. This course may also act as backbone to all other courses that are based on Object Oriented concept.

2. COMPETENCY

The course content should be taught and implemented with the aim to develop different types of skills so that students are able to acquire following competency:

• Design and Develop program following Object Orinted concept in C++ to solve given problem.

3. COURSE OUTCOMES

The theory should be taught and practical should be carried out in such a manner that students are able to acquire different learning out comes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

- i. Explain Object Oriented Programming concepts.
- ii. Use the basic programming constructs of C++
- iii. Apply object-oriented approaches to software problems in C++
- iv. Develop small scale programs in 'C++'.
- v. Debug and fix common errors in C++ programs

4. TEACHING AND EXAMINATION SCHEME

| Teaching Scheme Total Credits | | Examination Scheme | | | | | | |
|-------------------------------|--------|--------------------|---------|-----------------|----|-----------------|----|-------|
| (| In Hou | rs) | (L+T+P) | P) Theory Marks | | Practical Marks | | Total |
| | | | | | | | | Marks |
| L | Т | Р | С | ESE | PA | ESE | PA | 200 |
| 3 | 0 | 4 | 7 | 70 | 30 | 40 | 60 | 200 |

Legends: L - Lecture; T - Tutorial/Teacher Guided Student Activity; P - Practical; C - Credit; ESE - End Semester Examination; PA - Progressive Assessment

5. COURSE DETAILS

| Unit | Major Learning Outcomes (in | Topics and Sub-topics | | |
|--------------|--------------------------------|---|--|--|
| Cint | cognitive domain) | | | |
| Unit – I | 1a.Explain concepts of | 1.1 Introduction of Object Oriented Design | | |
| | Object oriented | 1.2 Object oriented programming and procedure | | |
| Introduction | Paradigm and | oriented programming | | |
| of object | Object Oriented | 1.3 Basic concept of Object oriented programming | | |
| oriented | programming | 1.4 Advantages of Object oriented programming | | |
| programming | | 1.5 Application of Object oriented programming | | |
| | 1b. Explain Basic of | 1.6 Basic structure of C++ | | |
| | C++ programme | 1.7 Library files in C++ | | |
| | | 1.6.1 ios, conio, math, stdlib | | |
| | | 1.8 Input /Output operators | | |
| | 1c.Use C++ Data types | 1.9 Data types | | |
| | and Variables | 1.8.1 Basic data type | | |
| | | 1.8.2 User defined data type | | |
| | | 1.8.3 Derived data type | | |
| | | 1.10 Declaration of variable with memory | | |
| | | concept | | |
| | | 1.11 Variables | | |
| | | 1.10.1 Reference variable | | |
| | | 1.10.2 Dynamic variable | | |
| | 1d. Use different types | 1.12 Basic operators in C++ | | |
| | of operators in C++ | 1.13 Scope resolution operator | | |
| | | 1.14 Memory management operator and manipulators | | |
| | | 1.15 Memory reference operator | | |
| | | 1.16 Type casting | | |
| | | 1.10 Type casting | | |
| Unit – II | 2a. Explain concept of | 2.1 Difference between class and structure | | |
| | class and object | 2.2 Implementation of class | | |
| Class and | | 2.3 Creating object of class | | |
| Object | | 2.4 Memory allocation for object | | |
| | | 2.5 Data member and member function | | |

| Unit | Topics and Sub-topics | |
|---|---|--|
| | cognitive domain) | 2.6 Access modifier 2.6.1 Public 2.6.2 Private 2.6.3 Protected 2.7 Static data member and function 2.8 Array of object 2.9 'this' keyword 2.10 Namespaces |
| | 2.11 Function Return type 2.12 Function prototype 2.13 Call by value 2.14 Call by reference 2.15 Call by address 2.16 Different types of function 2.16.1 Inline function 2.16.2 Recursive function 2.16.3 Friend function 2.17 Types of argument 2.17.1 Default argument 2.17.2 Constant value as a argument | |
| Unit – III Constructor and destructor | 3a.Use constructor and destructor | 3.1 Constructor with its characteristic 3.2 Types of constructor 3.2.1 Parameterized constructor 3.2.2 Copy constructor 3.4 Implement destructor 3.5 Comparison between constructor and destructor |
| Unit – IV Inheritance | 4a. Use Inheritance to create re-usable codes in C++ | 4.1 Concept of Inheritance 4.2 Utilities of Inheritance 4.3 Declaration of inheritance 4.4 Protected Access Specifier 4.5 Types of inheritance 4.5.1 Single Inheritance 4.5.2 Multiple Inheritance 4.5.3 Multi level Inheritance 4.5.4 Hirerchical Inheritance 4.5.5 Hybrid Inheritance 4.6 Function overridding |
| | 4b Create and use abstract class | 4.7 Concept of constructor in sub class 4.8 Virtual base class 4.9 Abstract class |
| Unit – V | 5a. Understand | 5.1 Concept of polymorphism |

| Unit | Major Learning Outcomes (in cognitive domain) | Topics and Sub-topics |
|---|---|---|
| Polymorphism and Virtual5.3 Types of polymorphic 5.3.1 Function | | 5.2 Use of polymorphism 5.3 Types of polymorphism 5.3.1 Function overloading 5.3.2 Operator overloading |
| | 5b. Describe the Virtual function | 5.4 Utility of Virtual function5.5 Virtual function characteristics5.6 Pure virtual function. |
| Unit – VI Managing Input/Output Stream | 6a. Use file stream in C++ | 6.1 File stream classes6.2 Formatted Input/Output operations6.3 Unformatted Input/Output operations6.4 Managing output with manipulators |

6. SUGGESTED SPECIFICATION TABLE WITH HOURS & MARKS (THEORY)

| Unit | Unit Title | | Distribution of Theory Marks | | | |
|------|--|----------|------------------------------|-------|-------|-------|
| | | Teaching | R | U | Α | Total |
| | | Hours | Level | Level | Level | Marks |
| Ι | Introduction of object | 11 | 4 | 8 | 2 | 14 |
| | oriented programing | | | | | |
| II | Class and Object | 8 | 2 | 4 | 8 | 14 |
| III | Constructor and | 4 | 2 | 2 | 4 | 08 |
| | destructor | | | | | |
| IV | Inheritance | 8 | 4 | 4 | 8 | 16 |
| V | V Polymorphism and | | 2 | 4 | 4 | 10 |
| | Virtual function | | | | | |
| VI | Managing Input /Output | 4 | 2 | 2 | 4 | 08 |
| | stream | | | | | |
| Tot | Total 42 16 24 30 70 | | | | | 70 |

Legends: R = Remember; U = Understand; A = Apply and above levels (Bloom's revised taxonomy)

Note: This specification table shall be treated as a general guideline for students and teachers. The actual distribution of marks in the question paper may vary slightly from above table.

7. SUGGESTED LIST OF EXERCISES/PRACTICAL

The practical/exercises should be properly designed and implemented with an attempt to develop different types of skills (**outcomes in psychomotor and affective domain**) so that students are able to acquire the competencies/programme outcomes. Following is the list of practical exercises for guidance.

Note: Here only outcomes in psychomotor domain are listed as practical/exercises. However, if these practical/exercises are completed appropriately, they would also lead to development of certain outcomes in affective domain which would in turn lead to development of **Course Outcomes** realted to affective domain. Thus over all development of **Programme Outcomes** (as given in a common list at the beginning of curriculum document for this programme) would be assured.

Faculty should refer to that common list and should ensure that students also acquire outcomes in affective domain which are required for overall achievement of Programme Outcomes/Course Outcomes.

| Sr. | Unit | Practical/Exercise | Apprx. |
|-----|------|---|----------|
| No. | No. | (outcomes in psychomotor domain) | Hrs. |
| | | | Required |
| 1 | Ι | Develop programs using Input/Output operators. | 2 |
| 2 | Ι | Develop programs using Control structure. | 4 |
| 3 | Ι | Develop programs using array of object. | 4 |
| 4 | II | Develop programs using call by value ,call by reference and function overloading | 4 |
| 5 | II | Develop programs on default arguments, constant arguments | 4 |
| 6 | II | Develop programs on function overloading | 4 |
| 7 | II | Develop programs using different classes such as student, | 4 |
| | | distance, shape, employee, feet, time, data etc. with data | |
| | | member & member functions. | |
| 8 | II | Develop Programs using array of objects and static | 4 |
| | | member functions. | |
| 9 | II | Develop programs using Friend function. | 2 |
| 10 | III | Develop programs using various types of constructors and destructor. | 4 |
| 11 | IV | Develop programs using single, multilevel, multiple | 2 |
| 11 | 1.4 | Inheritance | 2 |
| 12 | IV | Develop programs using inheritance and constructors. | 2 |
| 13 | IV | Develop programs using Virtual base class. | 2 |
| 14 | V | Develop programs using 'this' key word. | 4 |
| 15 | V | Develop programs using virtual function. | 2 4 |
| 16 | VI | Develop programs using unformatted input/output | 4 |
| | | functions. | |
| 17 | VI | Develop programs using formatted input/output functions. | 4 |
| | | Total Hours | 56 |

8. SUGGESTED LIST OF STUDENT ACTIVITIES

Following is the list of proposed student activities such as:

- i. Develop program with real life applications
- ii. Develop Mini Projects

9. SPECIAL INSTRUCTIONAL STRATEGIES (if any)

Supervised Practical Exrecises should be carried out as above and student group size should be as minimum as possible for effective learning.

10. SUGGESTED LEARNING RESOURCES

(A) List of Books:

| Sr.No. | Title of Books | Author | Publication |
|--------|----------------------|----------------|-----------------|
| 1 | Object Oriented | Sourav Sahay | Oxford |
| | Programming with C++ | | |
| | (Second edition) | | |
| 2 | Object Oriented | E.Balagurusamy | McGrawHill |
| | Programming with C++ | | |
| 3 | Object Oriented | Robert Lafore | SAMS |
| | Programming in C++ | | |
| 4 | Mastering C++ | Venugopal | Tata McGrawHill |
| 5 | Programming in c++ | Ashok Kamthane | Pearson |

(B) List of Major Equipment/Materials with Major Specifications.

Hardware : Desktop Computer P-IV processor or higher

Software : Turbo C++/ Borland C++/ any other C++ compiler with integrated GUI Environment.

(C) List of Learning Websites.

- i. C++ Fundamentals:http://www.oupinheonline.com
- ii. C++ Tutorials: http://www.tutorialspoint.com/cplusplus/cpp_overview.htm
- iii. Video tutorials : http://nptel.iitm.ac.in/video.php?subjectId=106106093

11. COURSE CURRICULUM DEVELOPMENT COMMITTEE

Faculty Members from Polytechnics

- Prof. Priti.N.Parikh, Lecturer (I.T), Government Polytechnic, Ahmedabad
- Prof. Sandeep Modi, Lecturer (I.T), K.P.T.I.T. Sokali

Coordinator and Faculty Members from NITTTR Bhopal

- **Dr. Priyanka Tripathi,** Associate Professor, Dept. of Computer Engineering and Applications.
- Dr. R. K. Kapoor, Associate Professor, Dept. of Computer Engineering and Applications.
